

INTEGRATED SYSTEM OF BRONNIKOV-FECLERON-WEIS PSYCHO-PHYSIOLOGICAL HUMAN DEVELOPMENT.

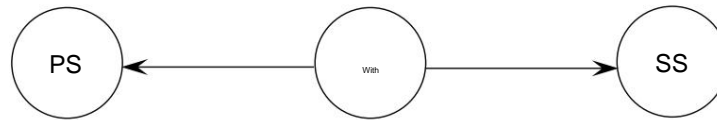

The complex system of development and transformation of personality includes three systems "Information development of a person", a system "Holographic development of a person" and a system "Human Internet".

The basis of the complex system is built on:

1. The hypothesis of two outstanding modern scientists - the pioneers of quantum physics - David Bohm, a student and follower of A. Einstein, and the famous neurophysiologist Karl Pribram, who wrote about the "living form of a hologram" of the human brain.
2. "Systemic movement" by P.K. Anokhin, which allows understanding the isomorphism "top down" and "bottom up" of the functional processes of living entities - from the simplest to social, and thereby create a System of Systems.
3. Theory of D.N. Uznadze, which is a breakthrough beyond the boundaries of understanding a person as rationally adapted, i.e. adaptable being.
4. The concept of the three worlds of K. Popper, which, in contrast to the philosophy of Aristotle, for the first time considers not two, but three worlds: first, the world of physical objects or physical states; secondly, the world of states of consciousness, mental (mental) states, and, perhaps, predispositions, dispositions (dispositions) to action; thirdly, the world of the objective content of thinking, primarily the content of scientific ideas, poetic thoughts and works of art.
5. Results of studies of the physical aspects of alternative vision by scientists A.E. Akimov and Yu.P. Pyt'ev, who investigated the physical nature of the phenomenon. Akimov discovered that this phenomenon cannot be shielded by existing methods, Yu.P. Pytiev, in turn, discovered the wave and holographic, non-electromagnetic nature of the phenomenon.
6. Results of studies of brain activity during the transition to an alternative vision, carried out by neurophysiologists O.I. Koekina and N.P. Bekhtereva, thanks to which it was found that the brain works in a more organized, systematic way, and at the same time, this vision mechanism is evolutionarily more perfect than the visual function of the eye.
7. Results of studies by psychophysiologists K.G. Korotkov and P.V. Bundzen on state control and biofeedback in the process of training direct vision skills through GDV visualization.
8. Results of research by neurogenetics P.P. Garyaev about wave nature genetic information.
9. Hypothesis of the President of the International Academy of Informatization I.I. Yuzvishina about the primacy of information and information processes, according to which information is primary, matter is secondary.
10. World experts in the field of neuroplasticity of the brain Rizzolatti Giacomo, Sinigaglia Corrado, research in the field of mirror neurons, called social neuroscience.
11. Psychobiocomputer technologies of V.M. Bronnikov based on the superconscious function of creativity and the formation of the beauty of psychophysiological phenomena.
12. System-holistic psychology of V.M. Bronnikov on the basis of a living form holograms of the human brain.

1. SYSTEM "INFORMATIONAL HUMAN DEVELOPMENT"

It is intended for the development of the superconscious function of the human body on the basis of auto-training, where consciousness develops and controls the functions of the Subconscious (PS) and superconsciousness (SS) of a person.

What does it give?

1. **At the first stage of development**, a person feels and controls the energy flows, life force, affecting the axons within the body and the environment.
2. **At the second stage**, the student stops getting tired, i.e. able to relieve stress body and quickly restore their vitality.
3. **At the third stage**, it activates protective functions and strengthens the immune system. Stops hurting.
4. **Fourth stage**. The inclusion of inner vision. Formation of the ability of intracerebral imaging. The ability to mentally draw any image, design, design, the formation of a new form of memory, the ability high-speed shooting, the ability to freeze the image, etc. - the technique is called "Charging for the brain." The brain begins to work systematically and holistically. At the same time, fatigue, heating, brain overload do not occur. Freedom is formed within the brain activity. (N.P. Bekhtereva. The book "The human brain was first opened")
5. **Fifth stage**. The development of an external, alternative vision of the surrounding space by the brain. The so-called "Radar Vision" is switched on, when the brain, emitting Cold Plasma, scans and receives return signals, forms an external image in the human brain. To develop the ability to use filters to display hidden objects, high-speed video shooting, the formation of a layered image, working out the accuracy and objectivity of vision.

Note: methods and methods of application in this system of effects and influences on the restoration of the quality of vision, intracerebral activity of the visual centers of the brain, restoration of blood circulation and nervation of the eyeballs and optic nerves. Totally blind people get the opportunity of alternative vision, physical and social rehabilitation. 6. **Sixth stage**. Formation of a new property of the human brain -

Psychobiocomputer. A

system of tools is formed inside the human brain, such as: - Display (one, six displays, holographic display).

• Keyboard (system, surround, "live" keyboard).

• Mouse (1 cursor, 2, 6, 12, 24 cursors and so on).

• Processor and programs for different tasks and scope of functions.

- Additional devices: scanner, modems, additional memory, and other tools of a different nature. 7. **The seventh stage**. Formation of one Psychobiocomputer on one neuron,

six Psychobiocomputers on six neurons, 12 Psychobiocomputers on 12 neurons, 24

Psychobiocomputers on 24 neurons, 72 Psychobiocomputers on 72 neurons, and so on.

2. SYSTEM "HOLOGRAPHIC HUMAN DEVELOPMENT"

The body of the human individual has huge potential

We have studied the possibilities and we use them:

First: the physical body in the material space consists of 15 bodies: • Dense bodies:

- Mineral level.
- Cellular level.
- Organism level.
- Intellectual level.
- Public level.
- Thin bodies:
 - Etheric body.
 - Astral body.
 - Mental body.
 - Causal body.
 - Buddhist body.
- Median bodies:
 - Superconsciousness.
 - Subconscious.
 - Consciousness.
 - The center of orientation of consciousnesses.
 - General body.

Each body has its own life, its own life programs, and at the same time they are interconnected. Their normal activity requires regular diagnostics, harmonization, correction to adjust the organs and functions of vital systems.

Second: it is necessary to consider 15 bodies of an individual in three spaces. AT Material Space, Non-material Space and Bardo Space.

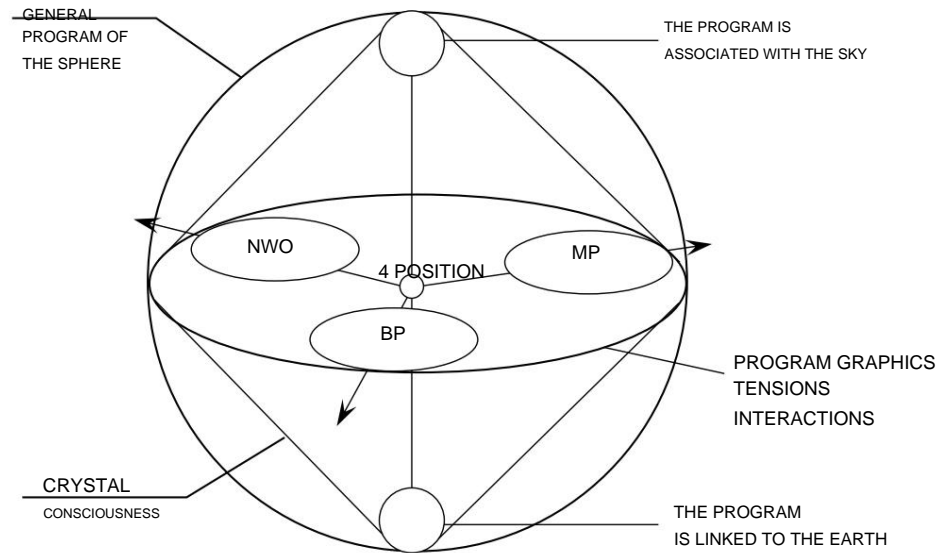

Bardo Space is the space where the formation and development of ideas takes place. In the process of life, space unfolds and the necessary structures are built, otherwise, by old age, this structure collapses and self-destructs.

Intangible space is the space for designing future events. It includes the design of 15 human bodies and their constituent elements. Some elements leave, and the NWO forms projects of new elements for their materialization.

Material space - carries out materialization and dematerialization elements of vital systems of 15 human bodies.

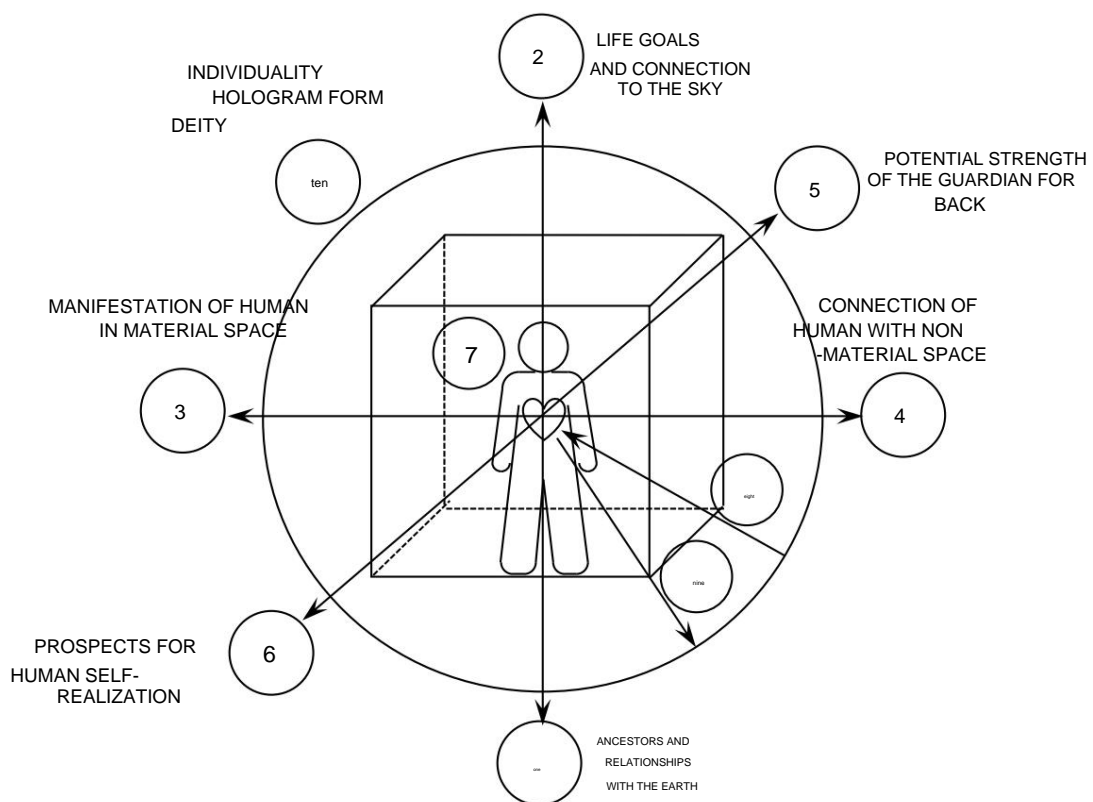

The knowledge of one's individuality is awakening and birth in one's own fifteen bodies. **Third.**

Three spaces of human bodies form the so-called Crystal of Consciousness in the graph of the tension of these systems, the awareness and worldview of a person depends on its quality.

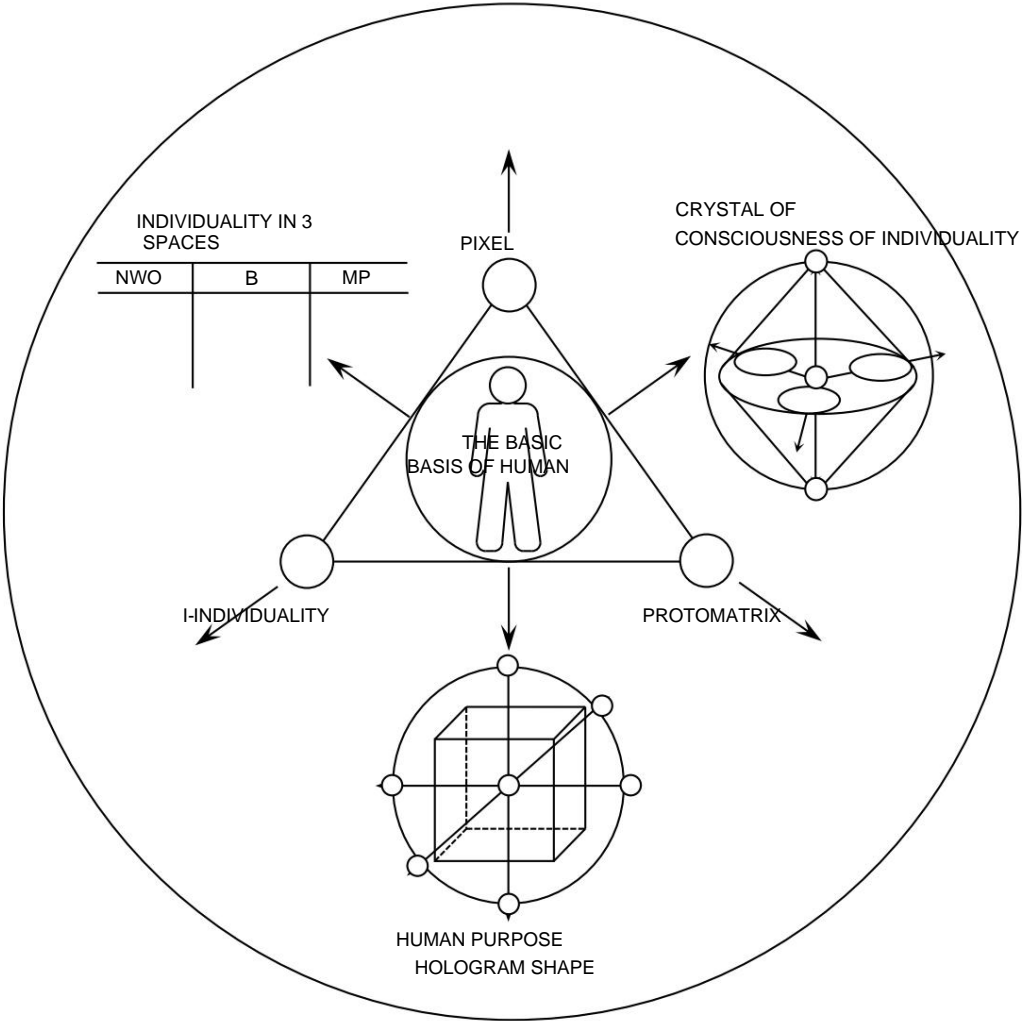

Knowing his Crystal of Consciousness, a person awakens and is born in his consciousness.

Fourth. In the Material Space there is a form of a hologram in which a person is located. This is the information structure of the superconscious function.

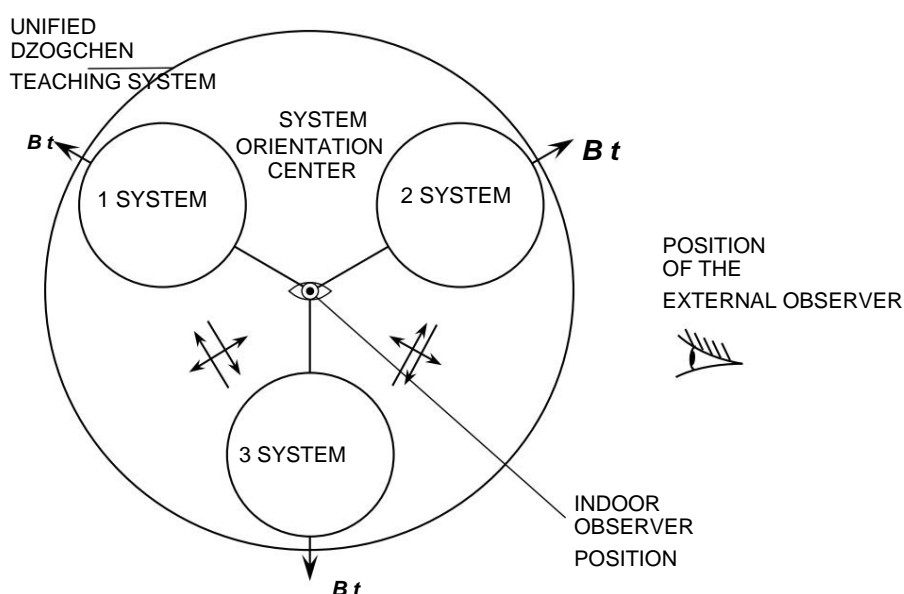

In the process of knowing the programs that form the Individual, they create the awakening and birth of a person in their Superconscious function.

Fifth.

3. SYSTEM "HUMAN INTERNET"

1. Synchronization of Psychobiocomputers of two specialists.
2. Synchronization and adjustment of two Psychobiocomputers, 6 Psychobiocomputers, 12 Psychobiocomputers, etc.
3. Formation of new properties and collective qualities as a system of tools
4. Construction of the Psychobiocomputer Tree of Life.
5. Interaction with different hierarchies of cosmic processes of the past, present, future.
6. Generation of Cosmic Humanity:
 - Blue.
 - Silver.
 - Precious People.
7. Work with the higher worlds.

THREE SYSTEMS REPRESENT A GRAPH OF THE STRENGTH OF THEIR INTERACTION IN THE HUMAN BODY**INTERNAL OBSERVER**

This is a psychological professional status. To do this, you need to know and be able to:

I. Mythology

1. Knowledge of the divine hierarchy.
2. What is the "Tree of Life".
3. Knowledge of the Void.
4. Three Pure Informations.
5. What is "Sky-Man-Earth"

II. Fundamentals of Philosophy

1. 10 cosmic laws.
2. The system of Yang and Yin phenomena.
3. Five elements as the basis of Nature.
4. Six basic energies.
5. Pixel, its types and qualities.

III. Worldview 1. 12

worldviews. 2. 9 alarm
systems. 3. 3 information
levels.

IV. Psychology

1. Psychology of
Superconsciousness. 2.
Psychology of the Subconscious.
3. Psychology of Consciousness. 4.
System-holistic psychology. 5. Psychology
of the Cosmic Man. 6. Technogenic Psychology.

V. Fundamentals of methodology 1.

Prayer. 2. Static meditation.
3. Dynamic meditation. 4. Post-
Meditation. 5. Three spaces of
existence of an individual and a person. 6. Crystal of
Consciousness of the Individual. 7. Shape of the Hologram of
Destiny. 8. Construction of the Internal Observer.

VI. Practical skills and abilities 1. Mastering the vital force. - bioenergy. - psychic

energy. - psychic plasma. 2. Mastering
9 forms of vision. 3. Mastering a new
property of the human brain - a
psychobiocomputer. 4. Construction of 6
Psychobiocomputers, 12 Psychobiocomputers, 24 Psychobiocomputers, 72
Psychobiocomputers, etc. 5. Mastering the Human Internet.

VII. Spiritual qualities 1.

Three levels of New Sanctification.
2. Construction of the "Tree of Life".
3. Divine Lamp. 4. Initiations,
Initiations, Admissions. 5. Dragon Man.

EXTERNAL OBSERVER 1.

The ability to exist outside of their bodies. 2. The ability to
see through the eyes of others. 3. Using the possibilities
of the Human Internet. 4. Using other people's Internet systems.
5. Fulfilling your destiny to work with the New Cosmos and the
Magical
Peace.

ATI YOGA IN SPIRITUAL TRANSFORMATION AND ASCENT OF MAN

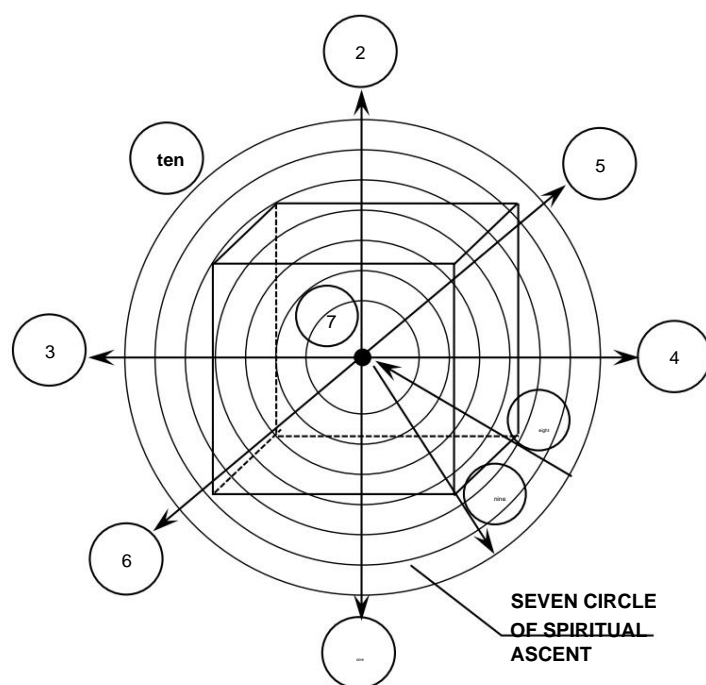

*What can a person in the ocean of life -
only drown. But
if it turns into a drop
ocean, then merge with it
into eternity of life.*

Ancient wisdom.

1. Ati-yoga is everywhere and in everything everywhere in a static and dynamic state. It is necessary to think about it, call it to yourself, so that it would create a movement and manifest itself through a person. The manifestation of Atiyoga creates the following effects:

A general feeling of expansion and expansion of the space of existence.

FORM OF ATI YOGA HOLOGRAM MANIFESTATION OF EFFECTS IN THE HUMAN BODY

- 1) Absence or disappearance of fatigue
- 2) Vision of the future
- 3) Enjoyment from any activities
- 4) Getting rid of diseases and problems
- 5) Increased vitality
- 6) Body rejuvenation
- 7) Feeling free
- 8) Opening the heart
- 9) Increasing awareness
- 10) Feeling enlightened and happy

2. How are these qualities achieved in the human body?

Five Ways of Spiritual Ascension:

- The correct attitude of a person to his body and the body as a whole.
- The use of prayers.
- Static meditation.
- Dynamic meditation.
- Use of PBK technologies.
